CABLE DREi

Test me. Feel me.

DUO
1 box RCA

**Deintermodulator
& Speaker Optimizer**
together!

Intro Level

A FORTUNATE DISCOVERY

Combining technology bi-metal cable with the effective DREi. Cables with separates nuclei of silver and copper polarized, extreme purity, shielded externally, and solid gold plated connectors high quality.

With the combination of these elements we have achieved to do "invisible" this cable for audio signal. When corrected cable technical factors, you get an absolute neutrality in sound transmission, with extreme accuracy and transparency.

CABLE DREi is an pasive cable which it has been implemented with active DREi technology, which it will increase the performance of the audio system, will optimize the connection between the components and will offer a outstanding musicality, crystal clear sound with excellent opening and three -dimensionality. A level of detail and a overwhelming silence.

The total Synergy of system will be much more equilibrated, the work of CABLE DREi in this regard is truly remarkable. The extraordinary control it exerts on the total energy to be amplified, allows higher SPL, before the audio system and the room start to saturate. The benefits of the music signal are undeniable.

Use these CABLE DREi for all analog line of interconnection in audio system.

Neutral Audio cables are built solidly, with high quality materials and hand made, in EU.

D.R.E.i
TECHNOLOGY

DREi tech attenuates harmful intermodulation between frequencies and those that occur in the electronic components that deteriorate the purity of the original musical signal. Increases performance speakers and associated amplification.

- High-quality gold plated connections.
- Silver wire lined with copper.
- Length 110 cm. See other measures.
- It includes a 12Vdc power supply (max. 8 box).
- Option PURE POWER SUPPLY
